

## Form F-1: Fine-Scale (Third-Order) Sage-Grouse Habitat Description

Description Year:	Counties:	State:
Evaluator(s):	Agency:	
Home Range Name:	Population:	
Lek Group Name:	General Location:	

### Data Sources

Land Cover Type Data Sources:	
Anthropogenic Features Data Sources:	
Population Data Sources:	
Data Storage Location:	
Software and Version:	
Mapping Grain:	Home Range Area Extent (km <sup>2</sup> ):

### Habitat Indicator Descriptions

1. Seasonal Habitat Availability	a. Area of occupied breeding habitat (km <sup>2</sup> ) = a. Area of occupied summer habitat (km <sup>2</sup> ) = a. Area of occupied winter habitat (km <sup>2</sup> ) = b. Area of potential breeding habitat (km <sup>2</sup> ) = b. Area of potential summer habitat (km <sup>2</sup> ) = b. Area of potential winter habitat (km <sup>2</sup> ) = c. Area of nonhabitat (km <sup>2</sup> ) (optional) = Discussion:
2. Seasonal Use Area Connectivity	Breeding to summer (km edge/km <sup>2</sup> of habitat) = Summer to winter (km edge/km <sup>2</sup> of habitat) = Winter to breeding (km edge/km <sup>2</sup> of habitat) =
3. Anthropogenic Disturbances	a. Densities of linear features (km/km <sup>2</sup> ) = b. Densities of point features (sites/km <sup>2</sup> ) = c. Area of nonhabitat or unsuitable habitat inclusions (km <sup>2</sup> ) = Discussion:

### Fine-Scale (Third-Order) Suitability Summary

<input checked="" type="checkbox"/>	Check the one description below that best describes the home range:
	<b>Suitable:</b> Home ranges have connected seasonal use areas. Anthropogenic features that can disrupt seasonal movements or cause mortality are generally absent or at least not widespread.
	<b>Marginal:</b> Home ranges have poorly connected or disjunct seasonal use areas. Anthropogenic features that can disrupt seasonal movements or cause mortality may occur within the home range.
	<b>Unsuitable:</b> Home ranges have seasonal use areas with predominantly grassland, woodland, or incompatible land uses (anthropogenic features) not conducive to sage-grouse seasonal movements or habitat use. Most leks have been abandoned or have few remaining birds.
Discussion:
